

OccuPlus provide the Occupational Health Industry with a complete occupational health software solution. With OccuPlus you only have to capture the patient/employee information once, or import it from a higher level HR or Health and Safety system. OccuPlus integrates directly with testing devices, capturing test results into a common database.

AudioPlus

The AudioPlus module enables occupational health professionals to track audiometric testing and results through direct interface with audiometer. Multiple Audiometers can run simultaneously.

SpiroPlus

The SpiroPlus module is used to efficiently track and record the lung function tests through direct interface with the spirometer.

VisionPlus

The VisionPlus module is used to efficiently track and record the vision tests through direct interface with the vision screener

AdminPlus

Customizable questionnaire & reports

The AdminPlus module enables you to go completely paperless
